

b

	reproduces out of sample	robust to LD	robust to leave-one-out	survives multiplicity	external evidence	test is calibrated
Ranking rule cannot distinguish shared from disjoint architecture	holds	holds	holds	—	holds	holds
Its error rate is set by the analyst's choice of list length	holds	—	holds	—	—	holds
Formal heterogeneity test dominates the ranking rule	holds	holds in part	holds	—	—	holds in part
PPMI enrolment flags predict cohort membership at 93%	holds	—	holds	—	—	holds
Reported accuracy is carried by study-design variables	holds	—	holds	—	—	holds
Nonlinear modelling adds nothing over an additive score	holds	—	holds	holds	—	holds in part
Polygenic burden brings onset forward (direction)	holds	—	holds	holds	holds	holds
...and by 1.97 years per SD (magnitude)	fails	—	fails	holds in part	fails	—
Risk alleles bring onset forward across 86 loci	holds	holds	holds	holds	holds	holds
Strata differ in per-variant architecture (global test)	fails	—	holds in part	fails	—	holds
Lysosomal loci carry excess onset signal	fails	—	fails	fails	fails	holds
No gene set carries onset signal beyond risk	holds	holds	holds	holds	—	holds
GALC and LRRC37A2 are not supported as onset targets	holds	holds	holds	—	holds	—

holds holds in part fails not applicable
